

ABSTRACT

A document data handling apparatus for coupling a plurality of document data, wherein each of the plurality of document data includes a plurality of types of files, the apparatus including: a document managing part configured to manage the plurality of document data; a document data coupling control part configured to control a document data coupling process in which the plurality of document data managed by the document managing part are coupled together to form second document data; and a document name generating part configured to cause a document name of the second document data obtained from coupling the plurality of document data to be a document name of one of the plurality of document data from which the coupling is thus carried out, and to use the document name of the second document data as file names of the plurality of document data from which the second document data is thus obtained.
